Hewlett-Packard

Hewlett-Packard (HP) and Hewlett-Packard Enterprise (HPE) are the technological backbone for the Israeli Apartheid system. HP serves as the exclusive provider of personal computers for the Israeli military.^[M13] These computers are used in the context of ongoing war crimes and systematic oppression of the Palestinian people. HP-E is contracted by Israel's Population and Immigration Authority to provide and maintain Itanium servers used to house Israel's population registry forming the basis of Israel's racist ID system.^[M14]

The ID system is the core of the Israeli apartheid regime's tiered system of citizenship and residency that privileges Israel's Jewish population and gives inferior status and rights to Palestinians.^[M15] This leads to institutionalised racial discrimination and segregation in freedom of movement, housing employment, marriage, healthcare, education and policing.

Technion Institute of Technology

Technion maintains multiple partnerships with Israel's top weapons manufacturers, including Elbit Systems and Rafael.^{[M6][M7]} Technion has developed a course on marketing the Israeli weapons industry to the international market for export.^[M8] Technion was involved in the development of the remote controlled D9 bulldozer used by the Israeli military to demolish Palestinian homes, roads, and infrastructure — actions considered to be collective punishment under international law.^{[M8][M9][M10][M11]}

Technion University has provided a series of financial grants to student soldiers committing Israel's genocide in Gaza.^[M12]

Hebrew University of Jerusalem

The Israeli government planned with the Hebrew University administrators to rebuild the campus on Mt. Scopus to naturalise the development of new Israeli settlements on expropriated Palestinian lands in occupied East Jerusalem.^{[M1][M2]}

The university acknowledged the land expropriation and necessitated "state intervention" to seize potential "available land" from the neighbouring Palestinian village of Issawiye.^[M2] Moreover, the university has offered its campus buildings to Israeli Occupation Forces to oppress surrounding Palestinian communities in the occupied East Jerusalem.^[M3]

The Hebrew University boasted about providing "diverse logistics equipment to several military units" during Israel's ongoing genocide in Gaza.^[M4] The university also immediately instituted an "Enhanced Financial Package" for soldiers committing Israel's genocide in Gaza that are also students.^[M5]

Weizmann Institute of Science

Along with Tel Aviv University in 2021, Weizmann Institute collaborated with the Israeli Antiquity Authority (IAA) to conduct archeological research and excavations in the Occupied Palestinian Territories (OPT) in the West Bank.^[M16] This constitutes a flagrant violation of the Hague Convention for the Protection of Cultural Property, where occupying powers are prohibited from conducting archeological excavations in occupied territories.^[M17] Israel is illegally overseeing 2,600 ancient sites in the occupied West Bank, making collaborating universities complicit.^[M18]

Weizmann Institute has introduced more than a dozen benefits for student soldiers committing Israel's genocide on Palestinians in Gaza.^[M19]

Tel Aviv University

In addition to its 2021 collaboration with Weizmann Institute and the IAA in illegal archeological research, Tel Aviv university runs joint centers with Israeli military and Israeli arms industries.^[M20] The university hosts the Institute for National Security Studies (INSS), which boasts of having developed the Dahiya Doctrine; the doctrine calls for the use of massive, disproportionate force and the deliberate targeting of civilians and civilian infrastructure.^[M21]

Tel Aviv University's venture capital firm, TAU Ventures, boasted about its investment in XTEND, which provides systems to deploy swarms of armed drones that have been used in Israel's genocide in Gaza.^{[M22][M23]}

Moreover, Tel Aviv University has introduced a hasbara (propaganda) course on Israel's genocide of Palestinians in Gaza, and has crowdfunded for "care" packages for soldiers committing genocide in Gaza.^{[M24][M25]}
